

# DeMonopol – Final Tokenomics & Strategic Investor Overview (Post-Burn, Corrected)

DeMonopol is building the world's first RWA platform for global real estate exposure—combining DeFi, tokenized property NFTs, a DAO-managed treasury, and an AI-powered data accuracy layer. Our tokenomics emphasise discipline and upside: • 92.5% of all unsold tokens have been burned • Total supply reduced from 15 B → 1.125 B MONO • Launching with < \$500 K market cap • Early backers gain entry via strategic OTC at \$0.00375 per token (min \$20 K)

## Token Allocation (Post-Burn Supply: 1.125 B MONO)

Pool	Token Allocation	% of Total Supply
Seed	120,000,000	10.67%
Private	94,500,000	8.40%
Public	360,000,000	32.00%
Airdrop	212,962,500	18.93%
Treasury	337,500,000	30.00%
Total	1,124,962,500	100%

## Updated Vesting Schedule (Designed for Scalable Liquidity)

Pool	TGE Unlock	Cliff	Vesting Duration	Monthly Unlock
Seed	8%	4 months	18 months	5.11%
Private	10%	3 months	12 months	7.50%
Public	13.3%	None	9 months	9.63%
Airdrop	1%	4 months	24 months	4.13%
Treasury	DAO Controlled	-	-	-

## Investor Highlights

- Launch Market Cap: \$418,950
- OTC Entry: \$0.00375 with strategic reserve capped at \$200 K
- Monthly unlocks smoothed to protect chart stability
- DAO-managed treasury ensures long-term alignment
- Access to global RWA assets across 5 countries
- GameFi loop + DeFi wallet = user funnel + yield
- Final cap table being closed — no rollovers, no dilution
